Juniata County Commissioners

Re: Multi-Jurisdictional Hazard Mitigation Plan

Dear Commissioners,

Upon reviewing the Hazard Plan for Juniata County, I would like to offer the following input.

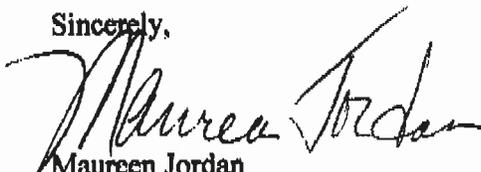

Appendix C (Hazard Profiles) states, *"Utility failure poses a maximum threat to the special needs population in Juniata County... (who) can be vulnerable to loss of heat or air conditioning during extreme weather months. The County must account for its special needs population during times of extreme utility failure."*

Juniata Agape Ministries may be able to be a resource in this regards. The JAM House is a facility that offers the following:

- A large home with several extra beds available for emergency use. Also, in an extreme emergency requiring housing of many special needs individuals, we have two large rooms on the lower level of the home.
- Staffing to understand and handle the care of this special population.
- Close to a main road for easy access.

If you see a benefit to pursuing this further, please contact me to set up a meeting.

Sincerely,

 Maureen Jordan
 Executive Director
